

PIPELINE & SEWER JETTING

Porta Kleen's pipeline jetting service allows for cleaning nearly 2,500 feet of sewer pipe daily without the use of fresh water. The system continuously reuses and recycles water.

The Porta Kleen pipeline jetter features an advanced water pump capable of 65 gpm at 2,000psi and a boom movement system capable of a 15 foot reach.

FEATURES & SPECIFICATIONS

- 8-inch vacuum system with a heavy-duty, channel-reinforced elbow for maximum durability
- 180° manual rotation facilitates manhole entry and reduces traffic flow interruption
- Front-mounted digital display operation screen with diagnostic and trouble-shooting capabilities
- Tilt-ejection unloading provides fast and thorough removal of debris
- 6-stage wastewater filtration system
- Tilt-ejection unloading provides fast and thorough removal of debris
- Remote controlled vacuuming and water system, allowing for one man operation
- Integrated fall-protection harness decreases safety-related incidents

BOOM RANGE

15-foot reach
180° total range
45° upward pivot
25° downward pivot
35-foot digging depth

VACUUM BLOWER

4,000 CFM
18" blower

WATER PUMP

2,000 PSI
65 GPM

STORAGE TANK

1,200-gallon
water tank,
18 GPM flow

DEBRIS STORAGE

10-cubic yard
debris tank

CONTROL PANEL

Front-mounted
display, full control

SAFETY AND AFFILIATIONS

- Superior EMR and TRIR ratings
- All operators OQ
- Affiliations with all unions
- All operators OQ
- Affiliations with all unions
- Operators background & drug tested

HOSE REEL

Front-mount, 180°
rotation angle,
wireless control
