

The Porta Kleen Water System Trailer performs the functions of a typical indoor sanitation network by providing freshwater storage and transfer, as well as elimination and confinement of wastewater with the convenience of being dropped on site. The system is designed to support up to 5 independent feeds and offers a dependable and powerful solution in a single all-season package.

## FEATURES & SPECIFICATIONS

- Heated 14' trailer drops to the ground for dedicated on-site service
- Onboard fresh water pumps service up to 5 separate feeds
- Onboard macerator pump for waste
- Large capacity tanks reduce service frequency and extra-large waste tank helps prevent overfilling
- Powerful dual-pump system for operational redundancy in the event one goes offline
- Built-in four season winterization package prevents hoses and waste line from freezing in harsh conditions
- System has dedicated breakers for pump and winterization components
